EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dave Noonan on 07/26/2007.

The application has been amended as follows:

1. (Currently Amended) A user interface stored on a computer-readable storage medium to display and manage a collection of independent servers operating as if a single entity, comprising:

a representation of the collection of the independent servers as a single entity;

an individual representation of each independent server associated with the single entity, wherein if an action is performed on the representation of the collection of members, then the action is propagated to the collection of members, if the action is performed on the representation of the member associated with the entity, then the action is directed to the member;

a new cluster wizard that creates a new server and ~~sets up~~ displays at least two selectable load-balancing options for each independent server, wherein each server is given a suitable amount of work, one of the at least two selectable load-balancing options configures third-party load-balancing and the other option configures no load-balancing;

an add cluster member wizard that adds additional servers to the collection of servers; and

a new deployment wizard that deploys contents across the collection of independent servers.

Allowable Subject Matter

Art Unit: 2174

Claims 1-48 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art either alone or in combination doesn't teach the limitation of "a new cluster wizard that creates a new server and displays at least two selectable load-balancing options for each independent server, wherein each server is given a suitable amount of work, one of the at least two selectable load-balancing options configures third-party load-balancing and the other option configures no load-balancing, an add cluster member wizard that adds additional servers to the collection of servers and a new deployment wizard that deploys contents across the collection of independent servers" in combination with the other claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
